

Aloha All,

Many of you have called or emailed inquiring about the status of the Spring Break Madness. Up until yesterday it was a go however today USA Volleyball issue a memorandum cancelling the insurance that covers Events (including local tournaments, league play and practice sessions. This became effective today, 5:00 pm Mountain Standard Time and extends until March 31st at which time they will make another determination as to extend the cancellation period or reinstate the insurance coverage. This will result in the cancellation of the Spring Break Madness Tournament. Refunds for both the tournament entry fee and guest admissions will be made. This will take some time so please be patient.

Please check periodically the following website which is continually updated especially during this corona virus situation.

<https://www.teamusa.org/usa-volleyball/features/usa-volleyball-response-on-coronavirus>

Many have asked also about the remaining events scheduled at the Convention Center:

Aloha Region Regionals April 25, 26, 2020

Aloha Summer Classic – Memorial Day Weekend May 22, 23, 24, 25, 2020

Aloha Summer Classic – Father’s Day weekend June 19, 20, 21, 2020

The tournaments are subject to the decisions of our local authorities and USA Volleyball. Recommendation would be to sign up for the tournament but don’t remit any payments until we know for sure that the tournament is a “Go”.

The CDC highly recommends the following actions be taken to help prevent the spread of the virus:

- Most importantly, **if you have a respiratory illness or fever, please stay home.**
- Get a flu vaccine.

- Avoid contact with sick people (if you're sick, limit contact with others).
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Cover your nose and mouth with something disposable (like a tissue) when you cough or sneeze. Throw the tissue in the trash after you use it.
- Clean frequently touched items (cell phones, airplane seating area -tray table, screens, windows, arm rests, air vents, etc.).
- Clean your hands often by washing them with soap and water for at least 20 seconds or using an alcohol-based hand sanitizer that contains at 60%–95% alcohol. Soap and water should be used if hands are visibly dirty.
 - It is especially important to clean hands after going to the bathroom; before eating; and after coughing, sneezing or blowing your nose.
- Bring extra hand sanitizer with you to all events.

Mahalo to those who stayed till the very end. Your loyalty, support and patience is very very much appreciated.

Kent Ma
